MEMORANDUM FOR HEADS OF ALL PRINCIPAL DEPARTMENTS AND AGENCIES.

Subject: Mandatory Migration to Post-Quantum Cryptographic Standards (NIST FIPS 203 & 204).

1. Purpose: This memorandum provides binding executive guidance for transitioning air-gapped critical infrastructure and defense data networks to post-quantum cryptographic primitives.
2. Mandate: All document distribution workflows handling sensitive sovereign policy documents must enforce NIST FIPS 203 (ML-KEM-768) key encapsulation and NIST FIPS 204 (ML-DSA-65) digital signatures.
3. Provenance and Attribution: Multi-recipient distributed documents must incorporate forensic invisible watermarking bound cryptographically to recipient decryptions to enforce legal accountability.
4. Air-Gap Requirement: Telemetry, cloud key management systems (KMS), and public blockchains are strictly prohibited from critical document enclaves.
